PROFILE AND OBJECTIVE

Computer Science student with a strong interest in technology, innovation, and the development of intelligent and scalable solutions. I possess solid programming skills in Python, Java, C, C# and C++, as well as experience in full-stack development, web and mobile application development (Flutter, Android), and software engineering. My academic and applied projects have provided hands-on experience in artificial intelligence, enabling me to apply theoretical concepts to real-world problems.

Throughout my academic and professional journey, I have developed a proactive, analytical, and results-driven mindset, with experience in software development, requirements analysis, and system design. I also have foundational knowledge in information security, along with experience in leading and collaborating on academic projects, always emphasizing teamwork, clear communication, and technical rigor.

I am continuously seeking to expand my technical expertise and interpersonal skills, with a strong interest in software development, artificial intelligence, and cybersecurity. My goal is to contribute to challenging and impactful projects within collaborative and innovative environments, while pursuing continuous professional growth and actively contributing to digital transformation and technological advancement.

SKILLS

Programming Languages: Angular, Full-Stack Development, C#, Python, Java, C/C++, Flutter

Developer Tools: Git, Power BI, Bootstrap, MySQL, PgAdmin (PostgreSQL), Eclipse, Visual Studio Code, Trello, Jira (Agile Methodology), Azure (AI), Spring and Spring Boot.

Languages: Portuguese (native), English (advanced), Spanish (basic), French (basic).

Soft Skills: Logical and analytical thinking, leadership, teamwork, continuous learning, and creative thinking.

EXPERIENCE

Project Engineering Internship - Century Telecom

Apr. 2024 - Apr. 2025

Voice Corporate Team Intern

Contagem - Brazil

- Implementation of voice systems including analog technologies, R2 Digital, and SIP PBX solutions.
- Worked in the networking area using PHIPAM, SUMMIT, and Multi PuTTY Manager.

Software Development Internship - Group Software

Sep. 2025 - Dec. 2025

RHTECH Team Intern

Belo Horizonte - Brazil

- Worked on the development and maintenance of web and mobile applications, focusing on the Human Resources sector application. Responsible for implementing features, bug fixes, testing, monitoring deployment cycles, and collaborating with the team on continuous improvements in performance and usability.

Software Development Internship - Localiza

Feb. 2026 - Sept. 2026

Asset Regularization and Legal Team Intern

Belo Horizonte - Brazil

- Worked on the development and maintenance of back-end applications using C# and .NET Core, focusing on scalability, performance, and reliability. Experienced in building and deploying applications with Docker and Kubernetes, as well as managing development workflows through Azure DevOps. Responsible for applying Gitflow versioning best practices, contributing to event-driven architectures using RabbitMQ and Event Sourcing, and actively participating in agile ceremonies following the Scrum methodology.

EDUCATION

Pontifical Catholic University of Minas Gerais

02/2023 - Expected 12/2026

Bachelor's Degree in Computer Science - Morning Program

Belo Horizonte - Brazil

Epitech

09/2026 - 01/2027

Exchange Program

Paris - França

ADDITIONAL EDUCATION

Object-Oriented Programming with Java - ITA

2024

Power BI Fundamentals - Fundação Bradesco

2024

Advanced Java Programming Language - Fundação Bradesco

2023

Complete Web Development - Udemy (João Ribeiro)

2023
